Why Certification/Registration?
What is Certification/Registration?

Confused about registration?

We provide clients with information they need to make informed decisions.

**No One
Provides Service
like we do!!**

"We are your bridge to success"

What is ISO 9001:2000?

ISO 9001:2000 is a generic management system that can be applied to any organization, large or small, whether you are a manufacturer or service provider. The standard has been developed using a core set of eight quality management principles, which act as a common foundation for standards relating to quality management. It is applicable to service providers in a more usable format.

These are:

- Customer focus
- Leadership
- The involvement of people
- A process approach
- A system approach to management
- Continual improvement
- A factual approach to decision making
- Mutually beneficial supplier relationships

Why Would I need ISO?

To keep customers and keep your customers satisfied. Your product (which, could, be a service) needs to meet their requirements. ISO 9000 provides a tried and tested framework for taking a systematic approach to managing your business processes (your organization's activities) so that they consistently turn out product conforming to the customer's expectations. And that means consistently satisfied customers!

How will registration help you?

Quality and success are one in the same for most companies. Through an ISO 9001:2000 System your company will understand and be able to analyze where improvements can be made, so that time, money and other resources are utilized efficiently, this way saving your company time and money!!

The gains realized in efficiency and effectiveness will greatly enhance your ability to ensure your customers receive the ultimate benefit of your services.

What is ISO 14001?

The ISO 14000 standard provides management tools for organizations to control their environmental aspects and to improve their performance.

All together, these tools can provide significant tangible economic benefits, including:

- Reduction of:
 - ❖ raw material
 - ❖ energy consumption
 - ❖ waste generation/Disposal costs
- Improved process efficiency
- Utilization of recoverable resources.

With this economic benefit there can be environmental benefits also.

Why would I need ISO 14001?

ISO 14001:2004 is a tool that can be used to provide assurance to management that you are in control of your processes and activities having an impact on the environment. Employees are happier and feel safer if they are working for an environmentally responsible organization.

Reasons you may want/need ISO 14001:

- Customers may require registration
- Business not performing up to par
- Customer Satisfaction

ISO 14001:2004 can also provide assurance to stakeholders - such as customers, the community and regulatory agencies.

It is suitable declarations of conformity, assessment of conformity by an external stakeholder - such as a business client - and for certification of conformity by an independent registration body.

Other Standards we can help you with:

AS9100	Aerospace
QS-9000	Automotive
TS16949	Automotive
ISO 18001	OHSAS
TL9000	Telecommunications
ISO 13485	Medical
ISO 2200	Food
